Hello Trish,

I have received your email with attached letters and will share them with our Board members. My understanding and expectation is that the purpose of the ongoing outreach effort is to ensure that all voices and concerns are heard. In support of that purpose, and with the expectation that many individuals are more comfortable expressing concerns in one on one conversation or in small groups, the grantee and their consultant have designed a process where individual, small group and larger public meetings will take place. My sense is that this will enhance the outreach process and ensure all perspectives and concerns are accurately and fully represented. I further understand that the first of the larger public meetings will happen this fall.

Thank you,

Campbell

**Campbell Ingram**

Good Morning Campbell,

Can you please share this with the Delta Conservancy Board and confirm receipt of my email?

Additionally, I just learned from my constituents that not only do you have to RSVP for the meeting but you are given a private pass code that restricts access to the public. As stated in my attached letter to Abigail Fateman, Executive Officer of the East Contra Costa Habitat Conservancy, that having these two sub-group meetings on 8/26/21 & 9/1/21 are in direct violation to East Contra Costa Habitat Conservancy's written response to the questions posed by the community and the Knightsen Town Community Service District back on 9/11/19.

Respectfully,

Trish Bello-Kunkel

Chairperson, Town Community Services District
