

We, the undersigned Knightsen residents, property owners, tax payers and voters hereby petition the Knightsen Community Services District to immediately rescind the "enthusiastic support" they have provided to the proposed Knightsen Wetlands Restoration project. This un-welcome project would radically and irreversibly change the nature, environment and character of our country life-style community. We further petition that they, as our elected representatives, make the community's strong opposition to this project known in any presentations, discussions, conversations, correspondence (electronic or otherwise) they may have regarding this project as members of KTCSD.
